Nature Of Opinion

Docket Position: Against

Docket No. E-00000J-14-0023

I am a customer of Tucson Electric Power. I am a citizen of Arizona who is concerned about the environment, of Arizona and the planet. I, in good faith, chose to lease solar panels and have them installed on my roof to help reduce my environmental footprint. I honestly did this to also lower my electric bill. My solar panels do not supply enough power to cover my entire electric bill. In my opinion the utility companies should not penalize those of us whom have chosen to do the right thing for the environment. Furthermore I believe that all homes build in southern Arizona in 2016 going forward should be built with solar panels for heating water and supplying electric power. We have the perfect weather conditions for solar energy with at least 360 days of sunshine. Why would you even consider raising the rates for those of us that have done the right thing? This would be a disgrace. We all need to promote Arizona as a forward thinking state. The smog problem in the Phoenix area is already a national disgrace that can't be fixed by carpooling alone. We need to work together to address these pollution problems. Providing solar energy to homeowners and businesses would go a long way in correcting these problems. Please do the right thing and think of the future for your children and grandchildren. Please do not raise rates on those of us that care the most. We are doing the right thing. I'm still paying my fair share. R.E. Docket E-00000J-14-0023 Sincerely, Marsha Moses
